The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by US patent # 6,977,814 to Hornung.

Hornung shows an aluminum finned heat sink with a copper or silver insert for conductivity in the base. As pointed out previously, the recitation "does not contact a semiconductor device directly" fails to distinguish, because the device is not a positively recited element of the claim. A semiconductor device could be contacted with any portion of the base, including regions outside the central region where the conductive slug is located.

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Claims 2, 3, and 5-8 are allowed.

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.**

See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
